Summary

Nathan is a motivated and reliable Web Developer who is an honest and positive team player. He has dedication to achieving excellence and is eager to learn more. He is personable professional and confident in his knowledge within the web field. Nathan is an innovative problem-solver who searches for solutions both in and outside of the box. Nathan also keeps up to date within the web related fields, is interested in cutting-edge techniques, and adheres to web standards.

Work History

Web Developer
July 2011 - Present

Softext Publishing Inc

While working with Softext Publishing Inc. I worked with databases, PHP, ASP, HTML, CSS, JavaScript and everything between. My responsibilities included attending client meetings during the sales and development process, determining the appropriate technical solutions, and working with clients and Project Managers to build and refine graphic designs. I communicated to the Project Manager with efficiency about progress and/or delays and engaged in outside-the-box thinking to provide high value-of-service to clients. During this time I also alerted colleagues to emerging technologies and applications along with the opportunities to integrate them into operations and activities.

Web Developer, Designer, Hardware Tech
January 2011 - April 2011

ACT

While working with Affordable Computer Techs(ACT) on my Co-Op term I designed websites, interacted with clients, coded websites, preformed computer/electronic repair, completed computer tune ups, built custom computers, offered web hosting, designed logos and preformed some marketing.

Key Holder/Sales Associate
September 2008 - September 2010

GameStop

While working for GameStop/EB Games I maintained the store constantly. I worked with a team to complete both large and small jobs. As a key holder I was trusted with and responsible for opening the store alone.

Education

Web Animation and Design
2009 - 2011

Georgian College

The Web Animation and Design program prepares graduates for careers creating Web sites which are dynamic, well-structured and designed to address user needs and to satisfy project goals and objectives.
