Nathan Eyre Full Stack Web Developer

Summary

Nathan is a motivated and reliable Web Developer who is an honest and positive team player. He has a dedication to achieving excellence and is eager to learn more. He is personable professional and confident in his knowledge within the web field. Nathan is an innovative problem-solver who searches for solutions both in and outside of the box. Nathan also keeps up to date within the web related fields, is interested in cutting-edge techniques, and adheres to web standards.

Work History

Web Developer, Systems Designer
Softext Publishing Inc.
July 2011 - Present

While working with Softext Publishing Inc. I worked on websites and applications built on HTML, CSS, JavaScript, PHP, ASP, MySQL, SQL Server and more. My responsibilities included attending client meetings during the sales and development process, determining the appropriate technical solutions, and working with clients and project managers to build and refine graphics and designs. I communicated to the project manager with efficiency about progress and/or delays and engaged in outside-the-box thinking to provide high value-of-service to clients. I also alerted colleagues to emerging technologies and applications along with the opportunities to integrate them into operations and activities.

Freelance Web Developer
2011 - Present

While freelancing I have worked on business websites and full custom CRM systems for clients such as DOT Communications, and American Steel Clearance Buildings. I have also worked on a number of portfolio websites for individuals such as Rod Duder (Author), and Kodie Hayward (3D Props & Environment Artist).

Web Developer, Designer, Hardware Tech
ACT
January 2011 - April 2011

While working with Affordable Computer Techs (ACT) on my Co-Op term I designed websites, interacted with clients, coded websites, performed computer/electronic repair, completed computer tune-ups, built custom computers, offered web hosting, designed logos and performed some marketing.

Education

Web Animation and Design
Georgian College
2009 - 2011

The Web Animation and Design program prepares graduates for careers creating Web sites which are dynamic, well-structured and designed to address user needs and to satisfy project goals and objectives.
